Microsoft Internet Explorer 6 11.0.9600.16384 sp1 was released in August 2003 as a successor of Internet Explorer 6 9.0.8218.16421. 97 (or 6.0) '. Also have a look at this. Language: English Install Size: 7.94 MB - Windows 2000. Apr 7, 2008 Download and install GlobalTIS-V40.0.3-FOR-WINMDISP-ENGLISH-IOPF-NPF.zip free. GlobalTIS-V40.0.3-FOR-WINMDISP-ENGLISH-IOPF-NPF.7z. Q: Using strtotime with a time string - yyyy-mm-dd hh:mm:ss I'm trying to validate an input string - but i'm not exactly sure how to best validate a date. The string i have in mind is as follows - 2010-02-20 09:13:57 What i'm doing is I'm passing this string to strtotime - and i'm trying to get the unix timestamp of the above string to a variable. Is this the right way of going about it? Will it always give you the unix timestamp for the above string? A: If what you want is simple, yes, but if you want anything more, don't do that. Use DateTime: \$dt = new DateTime('2010-02-20 09:13:57'); echo \$dt->getTimestamp(); // 1447870177 And then convert into what you want to use, if you want unix time in seconds, use: \$unix\_time = \$dt->getTimestamp() / 1000; If you want it in whatever units you want, you can always use it after: \$unix\_time = \$dt->getTimestamp() / 1000; \$seconds = (int) (\$unix\_time % 60); \$minutes = (int) (\$unix\_time / 60 % 60); \$hours = (int) (\$unix\_time / (60\*60)); f678ea9f9e
